Male Hormone Survey

Rate the following list of symptoms using the following key:

Symptoms of Low Testosterone

- _____ Blunted Motivation
- _____ Diminished Feeling of Well Being
- _____ Diminished sex drive (decreased libido)
- _____ Sexual dysfunction (weak erections, fewer erections)
- _____ Reduced muscle mass and strength
- _____ Fatigue or decreased energy
- _____ Increased body fat
- _____ depressed mood
- _____ Decreased bone strength (osteopenia, osteoporosis)
- _____ Loss of body hair
- _____ General Aches and Pains
- _____ Hot flashes, sweats

Upon completion of your survey, discuss your current symptoms with your health care provider as the use of Hormone Replacement Therapy is a personalized decision based upon benefits and risks that may be associated.
